

Tiger Eye Administrate

Connect, move and govern data across your firm's tech stack with our powerful, modular solution for iManage, Practice Management Systems and much more.

Integrate Key Systems

Connect iManage, Practice Management Systems and much more for integrated workflows.

Move Content

Move data within iManage for archiving, and general database management and report on activity.

Manage Data Compliance

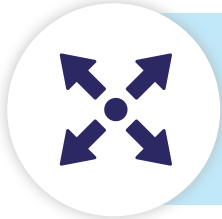

Automate core processes such as retention, archiving and deletion tasks in line with policies.

Administrate Modules:

Sync

Integrate systems (such as your PMS and DMS) to drive governed data flows and work *without* silos, ensuring your team never misses an update - and maintains updated records across your tech stack.

Move

Move content across libraries in iManage with ease. Simplify archiving processes by automating the archival of content once retention periods are met, with reporting across tasks performed.

Secure

Easily set, process and manage information control and security across your iManage DMS, including default security and access control lists set across Workspaces, Folders and Documents.

Delete

Automate scheduled deletion processes in line with company policies to ensure compliance, or simply complete bulk deletions with ease with detailed reporting and audit trails.

Key Benefits

- A one-stop modular solution for all your firm's iManage data management needs.
- Modular and scalable solution, for true flexibility.
- Platform agnostic solution for seamless connectivity, with out-of-the-box integrations between leading Practice Management Systems and iManage.
- Enhanced reporting across key activities, tasks and automations - with configurable reporting connections into a wide range of solutions.

Technical Overview

- Compatible with CSV and SQL.
- No minimum user count.
- Integrates seamlessly with iManage on-premises, as well as the iManage Cloud.
- Full REST compatibility for iManage.
- No additional licenses required (e.g., Microsoft Power Automate licenses).
- Flexible, highly-configurable modules.
- Support, training and client success packages available upon request.

Client Stories

How have our clients used Tiger Eye Administrate to reduce time waste, ensure compliance and work smarter with their data? Here are just a few examples of tasks and projects that can be optimised using our powerful solution.

- Integrating iManage with a Practice Management System to streamline new client onboarding workflows, with Workspaces made in the DMS automatically, with the necessary information drawn from the PMS as needed.
- Configure security and access controls for user accounts when new employees join the firm, ensuring they only access what they need across the DMS.
- Archive or delete Workspaces once a matter is complete, and the retention period has been met.

Are you confident with your current data management approach?

Facilitating best-in-class process automation and powerful data management functionality, Tiger Eye Administrate ensures you can trust in iManage as your 'Source of Truth' as a secured, governed and connected platform.
